

Planning Optimised Schedules

Allocating human resources in an optimal way is central to corporate productivity and competitiveness. Payroll expenses represent a substantial part of operating costs. Therefore, efficient schedule management is of primary economic concern. Shift Solution reduces the amount of time

spent on staff schedule planning. It considers all relevant data entered, to create schedules automatically according to all operating rules and restrictions. Shift Solution allows to you monitor labour allocation and control budgets, saving you time and money.

Shift Solution has flexible parameters for managing operating rules and requirements, to permit optimised schedule production, as show in this graphic.

Black: Demand for Staff in-store
Blue : Optimised scheduling
