

Replacement Module

The replacement module quickly and efficiently manages coverage of absent employees. Shift Solution selects the best staff members to be contacted as replacements within the confines of

employee availability and skills, and replacement operating procedures. Several parameters may be manipulated to determine who is eligible for selection to replace a shift:

- ◆ Seniority rules
- ◆ Employment status
- ◆ Labour negotiation affiliation
- ◆ Current work schedules
- ◆ Department

The replacement module can be easily configured to respond to your particular business needs, using these and many other factors.

Information Module

Information module		Double task assignment		Refresh	Export	S - Summary content				
	First name	Last Name	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	
▶	Marie-Pier	Ferland	00:00	00:00	08:00	00:00	00:00	00:00	00:00	▶
▶	Martine	Lapointe	00:00	00:00	00:00	00:00	00:00	05:00	00:00	▶
▶	Alain	Savard	00:00	08:00	00:00	00:00	00:00	00:00	00:00	▶

The information module in Shift Solution allows a multitude of scheduling information to be viewed easily. Reports of absenteeism, employee acceptance of replacements or double shift assignment, can be quickly referenced to provide essential information while planning schedules.

The information and replacement modules communicate to ensure that even a large bank of employees can be managed easily.
